

Description

Complete turnkey Hot Yoga studio system. A fully integrated system that includes ventilation, heating, humidification, fresh air, CO² management (optional) and energy conservation with closed proportional control, and easy installation and maintenance. Designed to reliably maintain 104°F with 50%RH in a space of up to 7060 cu.ft. The unit can be easily relocated with its built in casters. Air supply can come directly from the room or from a local duct network with or without outside air intake.

Features

- 3-in-1: Heating, ventilation and humidification
- External/remote temperature/humidity sensor
- 3-speed fan
- Room or outside air input
- Built-in thermostat with LCD
 - Displays temperature, humidity and fan status
 - Adjust temperature and humidity setpoints
 - Turn unit on/off
 - Change filter and system status indications
- Easy to install and to maintain
- Built-in casters enable easy wheeling from room to room
- Optional aroma essence distributor
- Optional 90° elbow and round adaptor

Guru Series

- Low noise modulating ECM fan
- Outside air mixing based on CO² sensor
- Intelligent filter replacement detection
- Optional anti-germ UV light
- Optional secondary heater to reheat outside air

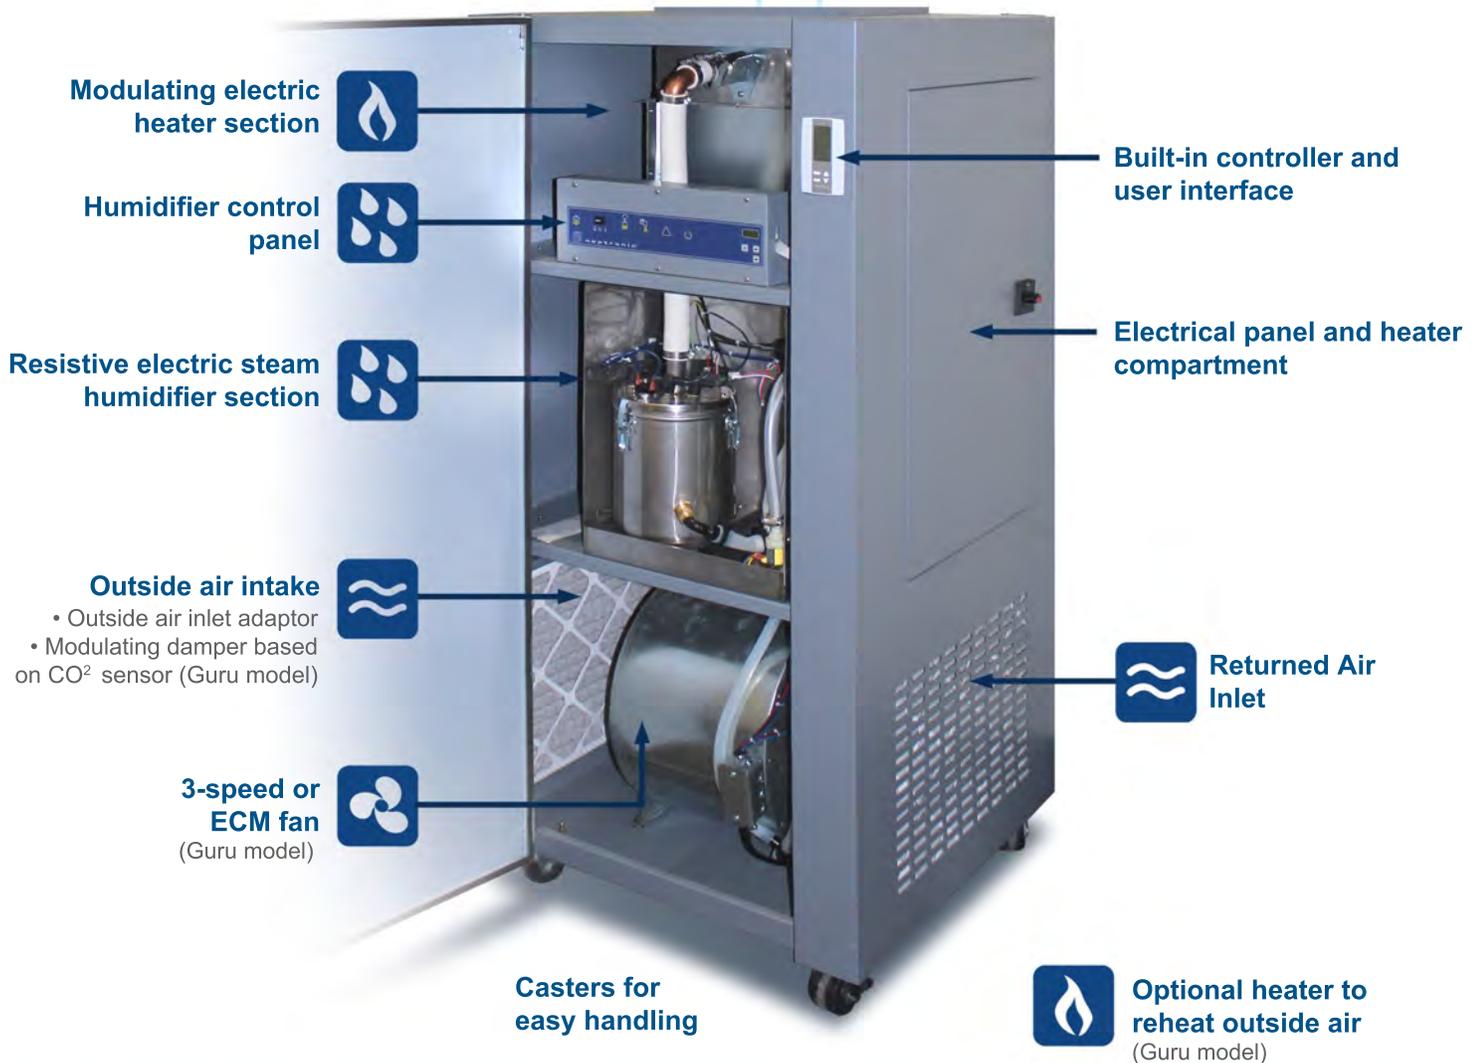

Optional 90° elbow

Air outlet
